## **BUTTON SHEET GUIDE**

These sheets are not designed to be printed under the same conditions. Groups 1-3 are to be printed in black on gold paper, preferably Neenah Astrobrights Sunburst Yellow; Group C is to be printed in color (CMYK) on white paper.

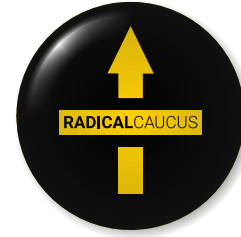

Group 1 is the main group of buttons. These are meant to be produced at the highest quality and are the buttons expected to be in the highest demand. Please report any noticeable information about actual demand to James Gholston so that future releases of this button collection may be adjusted accordingly.

Group 2 is the supplemental group of buttons. These are meant to be produced in reasonable quantities, but not as many as the main group. Possibly at a ratio of one set of Group 2 sheets to four sets of Group 1 sheets.

Group 3 is the abolition group of buttons. These are meant to be produced at a low volume, providing a large number of buttons in total. Ideally, anyone at the event will see a large number of people wearing Abolish \_\_\_\_\_ buttons, with each button calling for the abolition of something different.

Group C is the color group of buttons. These are printed differently than the rest — in color on white paper — and are special cases without default handling for quantities.
